THE BANDURA CYBER MSSP PARTNER PROGRAM

MSSP Partner Program

WHY PARTNER WITH BANDURA CYBER?

- **Increase customers' network defenses** by offering a differentiated Managed Threat Intelligence Gateway (TIG) service powered by the Bandura Cyber TIG.

- **Increase your revenue opportunities** with a turnkey, automated Threat Intelligence solution that's easy to deploy and delivers powerful out-of-box value.

- **Easy deployment and central management** of large-scale, distributed Bandura Cyber TIG deployments through a multi-tenant, cloud-based managment console.

- **Improve service delivery and margins** by increasing security operation effectiveness & efficiency via alert reduction, automation of manual workloads, and automated blocking through integrations with SOC tools like SIEMs.

- **Complements and increases the value of existing services** including managed firewall, IDS/IPS, threat intelligence, and monitoring services

PROGRAM HIGHLIGHTS

- Attractive product discounts
- White label/OEM options
- Flexible billing terms
- Deal Registration
- Dedicated Account Manager
- Dedicated Partner Portal
- Sales and Technical Training
- Demo (NFR) Equipment Discount
- Product & Marketing Collateral
- Joint Marketing Initiatives

THREAT INTELLIGENCE-DRIVEN PROTECTION

The Bandura Cyber Managed Security Service Provider (MSSP) Partner program enables MSSPs to offer an easy-to-deploy, automated managed threat intelligence gateway service that increases MSSP revenue opportunities, improves margins, and enables increased value-add and differentiation for your services.

DELIVER AUTOMATED & ACTIONABLE THREAT INTELLIGENCE-AS-A-SERVICE

- **Turnkey "Out of the Box" Access to Massive Volumes of Threat Intelligence** from multiple sources, including leading commercial sources, open source, industry, and government, arming IT and security teams with comprehensive, up-to-date, actionable threat intelligence feeds. Block by reputation, blacklist, GEO-IP, and/or organization (based on ASN).

- **Aggregates & Automates Threat Intelligence from any source** with the Bandura Cyber TIG providing a central aggregation point for multiple sources of threat intelligence that easily be managed and analyzed. Easily integrate threat intelligence using an open API or STIX/TAXII. Threat feeds automatically updated in real time reducing manual workload and security coverage gaps.

- **Take Scalable & Automated Action** by using threat intelligence to proactively block inbound and outbound connections to malicious IPs and domains. Filter traffic against over 150 million unique IPs and domain indicators without performance degradation. Automation reduces the need to manually maintain dynamic blacklists, ACLs, and firewall rules. Integration with SIEMs, TIPs, SOAR, and other SOC tools enables automated response.

Access **Aggregate** **Act**

Automated and Actionable Threat Intelligence

SIMPLE, AUTOMATED, POWERFUL, THREAT INTELLIGENCE SOLUTION

The Bandura Cyber Threat Intelligence Gateway (TIG) is a threat intelligence solution that aggregates, automates, and operationalizes massive amounts of threat intelligence to block known threats and unwanted traffic from your customers networks. The Bandura Cyber TIG provides MSSP customers with an additional layer of security while providing MSSPs with a differentiated service offering that enhances revenue opportunities and increases the efficiency of security operations.
